PROFESSIONAL SUMMARY

Computer Science graduate with full-stack and application development experience across Java, Python, and JavaScript, including Android and UI development. Two-time intern at Harford Mutual Insurance Group with NSA-accredited security training and a 2nd-place finish in a collegiate cybersecurity competition — bringing a security-minded approach to building software.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, Haskell, HTML, CSS, SQL

Development: Full-stack web development, UI development, Android app development

Databases & Tools: MongoDB, SQL Server, Power BI, Sapiens PolicyPro, Git

Security: NSA-accredited computer security training; CTF-style vulnerability analysis

Soft Skills: Client communication, troubleshooting, teamwork

EXPERIENCE

Application Development Intern — Harford Mutual Insurance Group

May 2025 – Aug 2025

Harford, MD

- Completed configuration training on the Sapiens PolicyPro system and contributed to application configuration within an enterprise policy administration platform.
- Developed SQL queries and Power BI solutions to turn raw production data into interactive, user-facing visuals.
- Provided technical support on billing system projects, debugging issues and collaborating with development and business teams.

Tech Services Intern — Harford Mutual Insurance Group

May 2024 – Aug 2024

Harford, MD

- Diagnosed and resolved internal IT tickets spanning hardware, software, and network issues in a production business environment.
- Performed device setup, data migration, and onboarding/offboarding support across the organization.

PROJECTS & COMPETITIONS

Couch Attack — Browser Game

drew-stephens-22.github.io

- Built a playable browser game in JavaScript, HTML, and CSS with multiple selectable levels, enemy characters with distinct point values, and an in-game settings menu — handling game state, scoring, and user input entirely client-side.

Recipe Storage — Web Application

drew-stephens-22.github.io

- Developed a web app for saving and browsing recipes for later use, with favoriting and search functionality built in JavaScript, HTML, and CSS.

Personal Portfolio Website — drew-stephens-22.github.io

- Designed and built a responsive portfolio site from scratch in HTML, CSS, and JavaScript to showcase projects, with interactive project cards and expandable detail views.

PACISE Cybersecurity Competition — 2nd Place

April 2025

- Solved challenges across four categories (e.g., cryptography, forensics, web exploitation), applying scripting and systems knowledge under time pressure.

EDUCATION

Bachelor of Science, Computer Science — West Chester University

May 2026

West Chester, PA

CERTIFICATIONS

- Computer Security Certificate, NSA Accredited (May 2026)
- Google AI Essentials (June 2026)
- SAS Programming 1: Essentials (June 2026)

ADDITIONAL EXPERIENCE

Ace Hardware (2023–2024); self-employed landscaping (2017–2023); West Chester Water Polo Club (2022–2026).
